

TC-G Butt Seam Clip

The TC-G Butt Seam Clip has been specifically designed for butt seam applications when building with the TC-G hidden fastening system. This clip has been designed as a mirror image of the TC-G clip allowing an installer to install two clips per joist at the butt seams. This eliminates the need for additional joists and creates a much stronger connection. The Clip is made of 304 grade stainless steel and is approved for use in saltwater applications and ACQ or chemically treated lumber for long-term performance. The clip's sharp prongs embed into the upper portion of the groove for strong holding power. The stainless steel screw ensures a lasting connection between decking board and joist.

- All clips and screws included in every package
- Spacer tabs on the clip automatically gap the decking 3/16" for a consistent look
